

Review project #1 (20 points...will go in assessments)

You are going to find 20 MC AP Statistics questions.

- 5 need to be from Data Analysis (dotplots, histograms, center and spread, outliers, frequency plots, skewness, measuring center and variation, comparing two distributions, correlation, regression)
- 5 need to be from planning a study (census, survey, experiment, observational study, sampling methods, confounding, placebo effect, blinding, blocking)
- 5 need to be from probability (binomial, geometric, random variable, basic probability rules, independence, normal distribution)
- 5 need to be from inference (confidence intervals and hypothesis tests)

Create a google doc (or word doc). Share all of the questions with me. Make sure they are organized in their respective category.
