

Friday the 13th

First of all, complete your two March Madness assignments. Reshare your portfolio folder with me so I can grade them. If they are not done by the end of class today, they will be 0's.

Secondly, create a website that describes your favorite horror movie. Save as horror.html. Create a CSS file and name it horror.css. Link the two files together.

The minimal requirements for this website are:

- Insert a video clip from the movie.
- Include information about plot, characters, etc.
- Create a header in Photoshop and insert the image on your page.

Make sure ALL files are saved in your Portfolio folder. Again, reshare your portfolio folder when done.
