

Project – Create a website for your own business

You are opening your own business! You need a website so you are creating your own. The minimum requirements are:

- Intro page about the business itself. Create a logo in Photoshop as well. Save page as intro.html.
- Contact page with location and contact information. Save as contact.html.
- Product and/or services page. Include images if needed. Save as content.html.
- Create business.css that is linked for use on each html page.
- Link all three pages together.

This is due on Friday, March 27th.

CATEGORY	4	3	2	1	0
Website pages	All three pages were created -- intro.html, contact.html and content.html	Two pages were created.		One page was created.	No pages were created.
Website content	The content was applicable and thorough on each page.	The content was applicable and thorough on two pages.		The content was applicable and thorough on one page.	The content was not applicable.
Design	The design was professional and the layout was good.		Either the design was poor or the pages were difficult to navigate.		Both the design was poor and the pages were difficult to navigate.
Sharing files	The files were shared with me.				The files were not shared correctly.
