

## Assignment #11

1. Create a dictionary of 10 major holidays. The key is the date and the value is the holiday....e.g. 7/4 is the key, Independence Day is the holiday. Ask the user to enter a date to look up....if not a holiday, say so...if so, print the holiday that corresponds with the date.
2. Write a program that continually reads in numbers from the user and adds them together until the sum reaches 100. Write another program that reads 100 numbers from the user and prints out the sum.
3. Create a dictionary of 10 words. The word will be the key and the definition will be the value. List the words for the user to choose from, then ask the user for the definition they are looking for.
